Education

VIT Bhopal University — Bhopal, Madhya Pradesh
B.Tech Major in Computer Science — 2022 - 2026
Cumulative GPA: 8.81/10

Skills

Programming Languages: C++, HTML, CSS, JavaScript, Python

Technologies and Framework: React.Js, MongoDB, TailwindCSS, BootstrapCSS, Node.Js, Express.Js

Tools & Platforms: Git/GitHub, Jupyter Notebook, Gemini LLM

Core CS Concepts: Data Structures and Algorithms, Object-Oriented Programming (OOP), System Design

Projects

Sarovar AI — Jan 2025 – Mar 2025
[ReactJS, TailwindCSS, MUI, ExpressJS, NodeJS, Gemini LLM]

- Developed a multilingual AI-powered platform serving 500+ farmers with crop prediction, water management, and resource allocation, leveraging large-scale data processing.
- Achieved 90% accuracy in crop recommendations using Gemini LLM, improving yield predictions through data-driven decision-making.
- Scaled to 3+ regional languages, boosting adoption in rural communities by 40% and demonstrating scalable system design.

Stay Heaven — Jul 2024 – Dec 2024
[ReactJS, TailwindCSS, Framer motion, ExpressJS, MongoDB, NodeJS, Socet.io, Nodemailer]

- Streamlined booking process, achieving 95% user satisfaction with AI-driven recommendations and personalized user experience.
- Automated 60% of bookings, increasing conversion rates through efficient backend integration.
- Built seller & admin dashboards, ensuring verified listings and faster approval, improving data integrity and security.

inVIcTus — Aug 2023 – Jan 2024
[ReactJS, TailwindCSS, MUI, ExpressJS]

- Created a platform serving 5000+ students with Course planning, faculty finder using floor mapping, and club discovery, enhancing academic efficiency through intuitive UI/UX design.
- Optimized course selection via interactive timetabling, reducing student workload and enhancing system performance.
- Boosted engagement through peer networking and mentorship features, fostering a stronger community.

Internship Experience

HPE CTY Summer Intern — Feb 2025 - Ongoing

- Engineered a hybrid RegEx-SVM machine learning model to extract timestamps and log levels from diverse system logs, achieving 94% accuracy and outperforming existing enterprise models
- Collaborated with visualization team to integrate ML outputs with ELK Stack (Elasticsearch, Logstash, Kibana), creating a real-time dashboard for processing hundreds of thousands of system logs
- Delivered an intelligent log analysis solution that streamlined anomaly detection, enabling faster system issue identification and reducing manual analysis time

Achievements

Smart India Hackathon '23 (Internal Winner) - Built Suraksha Sathi to help disaster relief agencies for faster response.

Solved 800+ DSA problems on LeetCode,GeeksforGeeks and Codeforce.

Reliance Undergraduate Scholarship 2022 – Awarded for academic excellence and leadership potential.

Featured on Times Square, New York.

Certifications

AI club VIT Bhopal: Front-end Sprint Hackathon — Competitive programing & DSA Hackathon
Fundamentals of Web Development
